INTRODUCTION

Supreme Rameshwar is a mineral packaged drinking water brand, which deals in 20ltr jars. We have been serving in the water industry since last 25 years.

We deliver not only water, but a bottle full of nutrients and minerals, which lead to better health and well being of the consumer.

The testimony of our quality is the belief and the trust several ministries and government authorities, have been keeping on us for years now.

OUR SPECIALIZATION :- Our USP lies in the bottles we use . We use bottles which are produced through a single stage process. Our bottles are PET food grade bottles, along with our brand name embossed on it , ensuring the quality.

PURIFICATION PROCESS

1. Careful Collection :-

Water collected undergoes quality check at source.

2. Ozone Treatment :-

Ozone is passed through the water to kill harmful bacteria.

3. Sand Filtration :-

Water is filtered and passed through sand , which removes unwanted particles upto 30 microns

4. Carbon Filtration :-

Gets rid of color , odor and harmful pesticides through double filtration.

5. Reverse Osmosis :-

Excess mineral and salts are removed. In this process, water is forced through the membrane, allowing water molecules to pass while blocking larger molecules, ions, and impurities.

6. Mineralisation :-

It is the process of adding back some crucial nutrients and minerals into the water. It boosts the nutritional value of water and gives it a sweet taste.

7. Micron Filtration:-

This step ensures that even the smallest micron particles present in the water is removed.

8. Re-Ozonisation:-

Helps to maintain purity and quality in the sealed condition of bottle.

9. Careful Bottling :-

Water is carefully bottled into single stage produced PET bottles.

10. Quality control :-

Every bottles has a unique code printed on it indicating the Batch Number , Time , Date and Manufacturing Place. Quality control checks are done to ensure that the quality of water is maintained.

After this cycle , The PET bottles undergo a 7 stage automated Washing system which makes sure that the bottles are well cleaned and hygienic.

BENEFITS

Hydration: Our water helps in maintaining proper hydration levels in the body, as it is free from calories, sugars, and additives.

Promotes Cardiovascular Health: The magnesium and calcium content in mineral water may support cardiovascular health by helping to regulate blood pressure and maintain a healthy heart rhythm.

Electrolyte Balance: The presence of minerals like potassium and sodium in mineral water helps maintain electrolyte balance in the body, supporting proper nerve and muscle function.
